EDUCATION

DY Patil International University	Pune, India
Degree: B.Tech in Computer Science and Engineering CGPA: 7.44	June 2022 – May 2026
Dreams Valley Public School	Satna, India
12th – PCM Percentage: 83.68%	May 2020 – May 2021

SKILLS SUMMARY

- **Programming Languages:** Java, Python, C++, JavaScript, OOP
- **Software Development:** SDLC, Agile/Scrum, RESTful APIs, HTML, CSS, PHP, React.js
- **Databases & Cloud:** MySQL, MongoDB, AWS
- **Core Concepts & Tools:** Data Structures & Algorithms, Operating Systems, GitHub, Postman, OpenCV, PyTorch, Problem-Solving

WORK EXPERIENCE

Web Developer Intern Radhakrishna Web Solution Link	June 2025 – Aug 2025
• Developed 10+ responsive web pages using HTML, CSS, and JavaScript, improving UI/UX and cross-device compatibility. • Built and integrated web applications including a Gym Website and HosLink property platform. • Developed PHP/MySQL backend modules for dynamic content management and database operations. • Integrated frontend and backend components and tested applications using XAMPP. • Collaborated on UI design and implementation using Figma, HTML, CSS, JavaScript, PHP, and MySQL.	
Research Intern University of Kerala Link	May 2025 – July 2025
• Benchmarked Neuromorphic SNN architectures against GPU baselines in PyTorch, analyzing up to 40% reduction in power consumption for edge NLP workloads. • Tested Spiking Neural Networks (SNNs) using Nengo, Brian2, and baseline models in PyTorch. • Explored ANN-SNN hybrid architectures for efficient NLP processing and real-time performance. • Contributed to a research paper, documenting energy efficiency, performance, and societal impact. • Tech Stack: Neuromorphic Computing, Spiking Neural Networks, Nengo, Brian2, GPUs.	

PROJECTS

SkinInsight AI Link	Feb 2026
• Developed a full-stack AI-powered skin analysis application using React.js, Python, MongoDB, and REST APIs. • Integrated Gemini API and Llama 3 for AI-powered skin analysis, chatbot interactions, and personalized recommendations. • Implemented image upload and processing using OpenCV to generate AI-based skincare insights. • Developed user history tracking, diet recommendations, and doctor consultation features. • Designed REST API endpoints for frontend-backend communication and data management. • Tech Stack: Python, React.js, MongoDB, REST APIs, Gemini API, Llama 3, OpenCV.	
FarmSmart AI Link	Nov 2025
• Developed a reinforcement learning-based smart irrigation system using Monte Carlo, TD Learning, Q-Learning, and DQN. • Built a data-driven environment using crop, soil, weather, fertilizer, and moisture parameters. • Trained Q-Learning and DQN models, achieving ~22% higher water conservation compared to traditional rule-based irrigation schedules. • Developed a Crop Requirement Checker with visual dashboards for irrigation and fertilizer recommendations. • Tech Stack: Python, Monte Carlo, TD Learning, Q-Learning, DQN.	

CERTIFICATIONS

Artificial Intelligence NPTEL Link	Oct 2025
Smart India Hackathon (SIH)-2024 Link	Sept 2024
Core Java Link	Nov 2025
AWS Fundamentals Link	Feb 2024

ACHIEVEMENTS & LEADERSHIP

- Solved 150+ algorithmic problems on LeetCode & GeeksforGeeks and actively participated in weekly global coding contests.
- Teaching Assistant: MAD, supporting students in coursework and technical learning.
- Hosted college events and completed a social work internship, demonstrating leadership, communication, and teamwork.
